>Welcome Message

Dear Colleagues, Scientists, Researchers, and Conference Participants,

It is my great pleasure and honor to invite you to the 7th International Conference on Nuclear Analytical Techniques (NAT 2026), to be held in September 2026 at the aT Center in Seoul, Republic of Korea.

Nuclear Analytical Techniques are vital in advancing human life across nuclear research and industry, environment, security, and cultural heritage. NAT 2026 will serve as a global platform for experts to share the latest research achievements and explore future development directions together.

This year's conference features an exceptionally diverse scientific program. We will engage in profound discussions on core foundational technologies, including Actinide Analytical Chemistry, Neutron Activation Analysis, Mass Spectrometry, and Accelerator-based Analytical Methods. Furthermore, participants will explore broad application fields, ranging from Radioecology and Nuclear Forensics to Radiopharmaceuticals and Material Structure Studies.

We also highly anticipate our two Special Sessions, designed to promote interdisciplinary research. The Cultural Heritage Session explores the use of radiation technology in conserving historical artifacts, while the AI and Robot-based Radiochemistry and Nuclear Chemistry session integrates cutting-edge ICT to showcase the innovative future of our field.

We kindly ask you to share your valuable academic achievements through active participation in oral and poster presentations. We sincerely hope this conference will help you build a strong global network with fellow researchers worldwide.

We look forward to welcoming you to the dynamic city of Seoul to open a fruitful chapter of academic exchange.

Welcome!

Dr. SUN, Gwang-Min and Dr. LIM, Sang Ho

Co-chairpersons, on behalf of Organizing Committee of NAT 2026
